

SIX-FIFTY IS PAID FOR GOOD LAMBS

Market Responding Nicely to Reduced Supplies the Past Week Or Ten Days—
Cattle Prices Advance.

Correspondence The Advocate.

KANSAS CITY, Mo., Nov. 9.—

Cattle received here this week 30,700, last week 74,400, same week last year 64,200 head. Shippers stayed home to vote this week, and failed to load anything after Tuesday, hence the receipts the last half of the week did not make up any of the shortage of Monday and Tuesday. Prices advanced fifteen to twenty-five cents on practically all kinds this week, except that veal calves got a half dollar uplift. Cows and heifers continued scarce, and are the object of a scramble on the part of buyers. Fed cattle are bringing \$7.50 to \$9.75, a little better than last week, but considerably less than feeders have been hoping for. The market is settling down to a basis from \$7.00 to \$9.00 for short fed cattle, in the opinion of dealers, who figure that enough short fed steers will be coming right along for the next few weeks to prevent any advance. Illinois and Iowa are carrying a great many cattle destined for a short course in the feed lot, and Chicago dealers fear a deluge of this unfinished stuff if prices soften much from the present range. Most of these steers will have to sell above \$8.00 to pay out. The Panhandle, New Mexico and Colorado are sending in a good many cattle, generally in good condition, and sales are satisfactory. Range beef steers have sold largely at \$5.75 to \$7.00 here this week, feeders \$5.65 to \$6.70, stockers \$5.25 to \$6.00, mountain cows \$4.50 to \$6.00, plains cows at \$4.00 to \$5.35, veal calves \$6.50 to \$10.00, bulls \$4.25 to \$4.85. Quarantine shipments have contained a few good steers, at \$6.00 to \$6.35, but most of the stuff has been common this week, steers at \$4.25 to \$5.50, cows \$3.75 to \$4.75.

Sheep received here this week 31,800, last week 82,800, same week last year 45,500 head. The market has responded nicely to reduced supplies, and best lambs are now selling at \$7.50, feeding lambs at \$6.00 to \$6.50, fat yearlings up to \$6.00, wethers \$5.25, ewes \$4.60. Shipments of feeders to the country from Chicago, Omaha and Kansas City since August 1st are 28 per cent less than for the same period last year.

WOOL SALES ARE GOOD AT THE BOSTON MARKET

BOSTON, Mass., Nov. 9.—Wool sold very freely all last week, the demand continuing active right up to election. Several good sized transactions were put through even on election day itself, the total sales for the week being estimated at five to six million pounds of wool. Leading features of the week have been the practical clearing up of the current stocks of Montana wool, continued heavy sales in the original bags, and heavy buying of New Zealand crossbreds by a leading mill. The latter operations amounted to about a thousand bales, the price paid being thirty-seven to thirty-eight cents. These wools were secured in an open market, but it is reported that the same concerns made contracts for delivery later of several hundred bales more of the same grade.

Domestic wools have sold quite freely, further transfers of half blood Montana wools being noted at thirty-six cents. The sales of this grade during the past fortnight are estimated at fully five million pounds. In addition to this there have been sold during the past week a large volume of Montana, New Mexico and Utah wools in the original bags, prices ruling about the same as previously quoted. Secured values are well maintained, fine staple territory being quoted at 63 to 67 cents clean; half blood staple, 62 to 65 cents; three-eighths blood staple, 57 to 58 cents; quarter blood staple, 53 to 55 cents; clothing territories, 60 to 62 cents for fine and 57 to 58 cents for fine medium.

Pulled wools are also attracting more attention, recent quotations based on sales being 52 to 54 cents for the best Eastern B supers, and 48 to 50 cents for Western. A supers have sold at 57 to 59 cents for New York pullings and 53 to 55 cents for Chicago. Fleeces have been quiet all the week, the bulk of the offerings being in fine washed delaine and clothing wools.

Prices are firmly held, as dealers believe that the remainder of their holdings will all be sold at good prices before the season is over.

TONIGHT.

Tonight, if you feel dull and stupid, or bilious and constipated, take a dose of Chamberlain's Stomach and Liver Tablets, and you will feel all right tomorrow. Sold by all dealers.—Adv.

IMPROVED METHODS

Advance Chapter From Geological Survey On Coal Mining.

As an indication of the improvement in coal mining methods the statement contained in the report on coal, by E. W. Parker, now being printed by the United States geological survey as an advance chapter from "Mineral Resources For 1911," is of interest. The number of machines used in mining coal in 1911 was 15,819, an increase of five hundred and sixty-five over 1910. The leading coal producing state, Pennsylvania, is also first in the total tonnage mined by the use of machines in use, but in the proportion of machine mined coal to the total output Ohio far outranks all other states. In 1911 Pennsylvania's production of machine mined coal was 69,131,223 short tons, or 47.75 per cent of the total. Ohio's production of machine mined coal was 26,558,630 short tons, or 86.32 per cent of the total. Ohio is third in the production of machine mined coal, though ranking fourth in the total production. West Virginia, the second state in coal production, is also second in the output of machine mined coal, which in 1911 was 29,121,489 short tons, or 48.67 per cent of the total. Illinois is fourth in the quantity of machine mined coal, with 22,093,507 short tons.

Although the total production of bituminous coal in the United States decreased from 417,111,142 short tons in 1910 to 405,757,101 short tons in 1911, the quantity of coal undercut or otherwise mined by the use of machines increased from 174,912,293 short tons to 177,971,976 tons. The percentage of the machine mined tonnage to the total output increased from 41.74 in 1910 to 43.89 in 1911.

Capable of Large Increase.

The progress made in recent years in the substitution of mechanical methods in the mining of bituminous coal has been one of the most interesting developments in the history of the industry. It has been stated by those who are familiar with bituminous coal mining in the United States that the mines at present developed are capable of producing, with a plentiful supply of labor and ample transportation facilities, from 50 to 75 per cent more than the best record of 1911 and even higher record of 1910. It is probably not an exaggeration to state that the bituminous mines of the United States could produce from six hundred to seven hundred million tons of coal without opening another new mine. In order to meet this condition and also to meet the general tendency toward increased cost of labor, operators have been impelled to the utilization of labor saving and expense reducing machinery.

Greater Safety Secured.

In addition to the lessening of the mining cost, however, there are two other aims to be accomplished by the use of mining machines. The undercutting of coal by hand is one of the most existing kinds of labor, and the use of machinery materially reduces the arduous tasks of the laborer. More important than this, however, it is Parker's belief, is the greater safety secured through reducing the practice, too prevalent in many mining districts, of "shooting from the solid." This practice can not be so strongly condemned, for it increases the liability to accident and is contrary to the principle of conservation in that it produces a considerable quantity of undecomposed or unmarketable fuel.

DECLARE WAR ON COLDS.

A crusade of education which aims "that common colds may become uncommon within the next generation" has been begun by prominent New York physicians. Here is a list of the "don'ts" which the doctors say will prevent the annual visitation of the cold:

- "Don't sit in a draughty car."
- "Don't sleep in hot rooms."
- "Don't avoid the fresh air."
- "Don't stuff yourself at meal time. Overeating reduces your resistance."

To which we would add—when you take a cold get rid of it as quickly as possible. To accomplish that you will find Chamberlain's Cough Remedy most excellent. Sold by all dealers.—Adv.

We write all liquor bonds at our Price office—no sending away or delays. R. W. Crockett & Co. Also plate glass insurance.

PRICE ROUTE IS "THE ONLY WAY"

(Continued from page three)

tion, with headquarters in Indianapolis, will bear the cost of material for finishing the highway and for bridges and culverts, their estimate being placed at ten thousand dollars a mile. The manufacturers recently agreed each to contribute one-third of 1 per cent of the gross output of his concern for three years. The states through which the highway runs will bear the expense of labor and the government will furnish the engineering force.

Entertained at Provo.

PROVO, Nov. 8.—A. L. Westgard and his party of Denver and Grand Junction men held a meeting at the commercial club at Provo tonight with the business men of Provo. Westgard explained that the route selected would be by way of Grand Junction, Price and Provo to Salt Lake City, and urged the formation of a society as a branch of the central organization which has headquarters in Denver. The Central Automobile association of Provo was organized tonight. W. H. Ray, president; Elmer Van Wagenen, secretary; Joseph A. Battle, treasurer. After the organization was perfected the visitors were banqueted.

RESOLUTIONS OF CONDOLENCE.

Whereas, It has pleased an All Wise Creator to remove from our midst Hon. Sumner J. Harkness, a former member of this board of commissioners of Carbon county, a highly and universally respected citizen, an empire builder, and a faithful, conservative and conscientious man; therefore, be it

Resolved: That in the death of Hon. Sumner J. Harkness, Carbon county loses one of its most highly respected and useful citizens, the state a loyal champion and Eastern Utah an ardent supporter in all matters pertaining to its welfare and betterment; be it further

Resolved: That this board of commissioners of Carbon county extends deepest sympathy to the surviving widow and the children and relatives of deceased in their hour of sorrow; be it further

Resolved: That a copy of these resolutions be spread upon the minutes of this meeting, a copy sent to the sorrowing family and also given to each of the newspapers of Price for publication.

ESCAPES AN AWFUL FATE.

A thousand tongues could not express the gratitude of Mrs. J. E. Cox of Joliet, Ill., for her wonderful deliverance from an awful fate. "Typhoid pneumonia had left me with a dreadful cough," she writes. "Sometimes I had such awful coughing spells I thought I would die. I could get no help from doctors' treatment or other medicines till I used Dr. King's New Discovery. But I owe my life to this wonderful remedy for I scarcely cough at all now." Quick and safe, it's the most reliable of all throat and lung medicines. Every bottle guaranteed; 50c and \$1.00. Trial bottle free at all dealers.—Adv.
